

OAKSMITH
FLOORING

Why Oaksmith

We are a local family-owned business with over three generations working within the hardwood & wood flooring industry.

We focus on bringing you the finest handpicked solutions in engineered wood flooring.

Our wood floors merge age old traditional craftsmanship with new complex reactive stain technology, creating unique colour palettes that allow the individual characteristics of each tree to shine through in the finished product. We take extra precautions to ensure all raw material is legally and responsibly sourced, plus our flooring is certified for zero emissions.

As your premier flooring company, we pride ourselves on our unwavering commitment to exceptional customer service.

Our mission is to go the extra mile to fulfil your flooring needs, ensuring you discover the ideal solution for your home or business. Please don't hesitate to contact us if you require advice or have any questions.

We look forward to helping you elevate your space with our top-quality engineered wood flooring. Trust Oaksmith Flooring to transform your environment with style and functionality.

Our Offering

Much of our flooring is used in high end offices, hotels and other commercial projects.

We can supply flooring direct ex factory, or through our warehouse to all 4 corners of the globe.

We supply a large amount of our flooring to professional installers, to competent DIY enthusiasts, and to retail clients preferring to arrange their own installation.

From stock, we offer a 1 strip plank and herringbone flooring. Bespoke to order, we offer a vast range of styles up to 400mm wide x 4000mm long.

BESPOKE PROJECTS

Residential, restaurant, bar, retail, hotel, workspace.

With over 2500 different SKU's available from Floorart Parquetry, we have products for all tastes and budgets. If not we can even colour & texture match to clients own specifications.

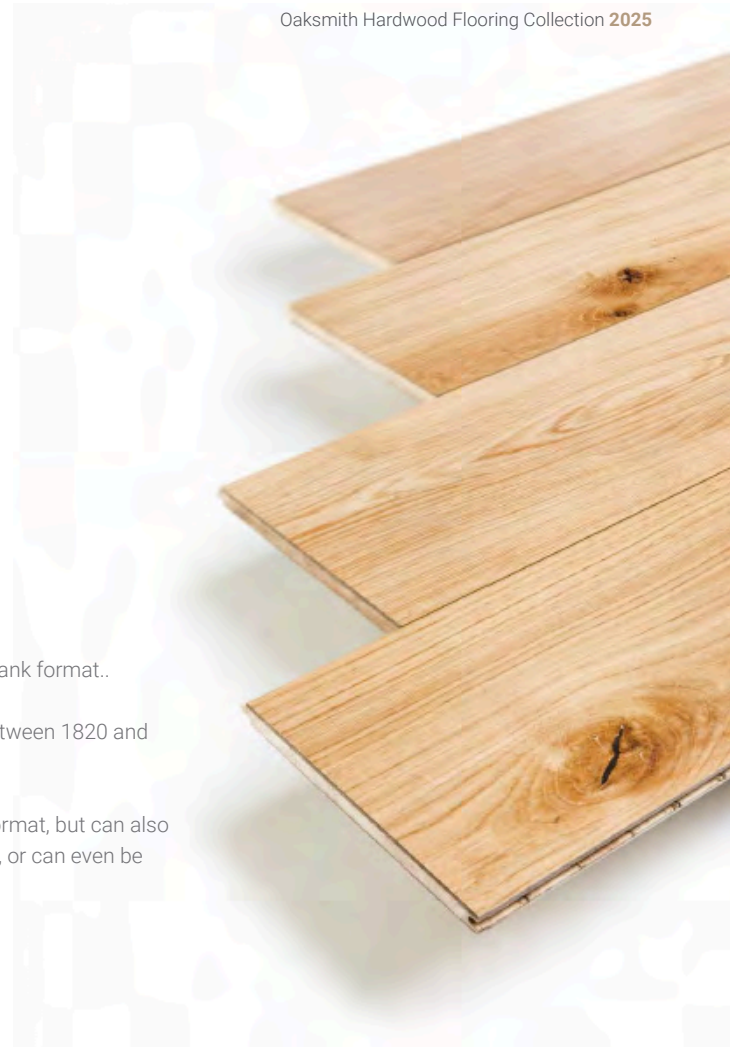

Plank Vs Herringbone

The Difference

Oaksmith Flooring offer a wide range of Floorart products in either Herringbone or Plank format..

The term "Plank", or "1-strip" relates to the long planks of wood which are typically between 1820 and 2540mm in length.

"Herringbone" are shorter boards which are usually, but not always laid in a ZigZag format, but can also be laid in a similar fashion to the plank flooring, used in a double herringbone pattern, or can even be combined with the plank.

WHY REAL WOOD?

Look

Oaksmith Flooring are the exclusive UK distributor of FloorArt Parquetry. No other flooring option compares to the classic elegance of an Oaksmith real hardwood floor, with many alternative products trying to replicate the look of real wood. But why have a copy when you can have the real thing? Nature spends decades forming the detail, tones and intricacies of every plank, something that cannot be replicated with mass produced alternatives.

Durability

With a little TLC, our hardwood floors will last a lifetime. All of Oaksmith's hardwood flooring options are treated with hardwearing, factory applied finishes to give outstanding durability.

Maintenance

Taking care of your hardwood floor is important, but it's a simple process. Avoiding outside dirt and grime being walked into the home, with occasional vacuuming and use of a Bona spray mop will help keep your floor in tip top condition.

Versatility

Oaksmith's hardwood floors provide a neutral background that allows for a multitude of decorating looks. Carpet typically has to complement the colour scheme of a room, whereas hardwood floors don't have that problem, and add a multitude of natural tones to work with any backdrop.

Allergen reducer

Hardwood floors don't collect dust and other allergens like carpet will and that makes it a better option for those with respiratory issues and allergies. Plus, all of Oaksmith's flooring is certified as "No Added Formaldehyde". Most other engineered hardwood flooring in the UK cannot match that standard.

Return on investment

A long-term investment that adds value. You will get to enjoy your Oaksmith hardwood floor twice over. Firstly, during home ownership and then all over again when it's time to sell. With the majority of homebuyers dreaming of a wood floor our engineered flooring is an investment that adds long-term value.

Sustainability

Please turn to page 10 for our full sustainability pledge.

HOW IT IS MADE

FloorArt's factory boasts a range of over 2,500 products. It is currently producing Oak floors with widths up to 400mm. It is one of the Worlds largest manufacturers of high end wood flooring.

All of our flooring features a 3-layer construction using a single specie plantation hardwood (Hevea Brasiliensis) as the core layer. This construction delivers greater dimensional stability compared to a plywood or softwood core as used by most other factories.

Our **RESIDENTIAL STRUCTURAL WARRANTY** covers your floor against delamination, deformation and warping for 25 years. In addition, our **RESIDENTIAL WEAR LAYER WARRANTY** declares that the coating of UV Urethane finished floors will not wear through for 25 years.

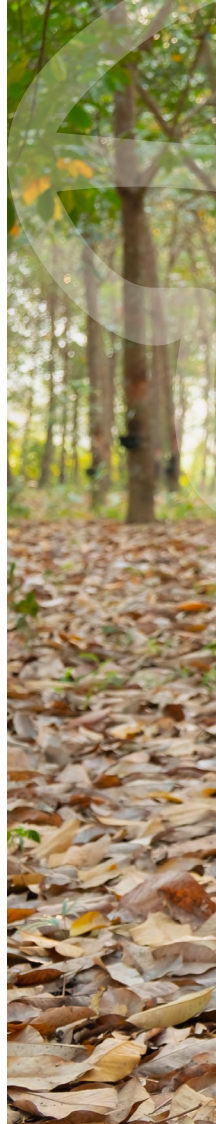

Sustainability

We believe that every company has a duty to be environmentally responsible and we take this responsibility very seriously. All of the material used to produce Floorart Parquetry is sourced from sustainably managed forests and meets stringent global environmental standards. Wood, if sourced correctly, is one of the most renewable resources in the world. Other kinds of manmade floors such as LVT and ceramics are produced in factories which require huge amounts of energy, with high CO2 emissions together with other greenhouse gases.

We use wood that is planted for the production of natural rubber as the base (core) for our products. This means the tree is neither removed from the forest nor cut down for timber. It is only felled when it has to be replaced towards the end of its natural productive life. In fact around 70% of every board we produce as finished flooring is from plantation sourced wood. Not only is this good for our planet, our single specie hardwood core offers far better long term stability than most other, often cheaper, formats used for engineered hardwood flooring.

For the precious hardwood that is used for the face, we take every care to ensure that we purchase only legally sourced timber. You may therefore walk on your beautiful floor with absolute confidence that you have made the right choice for both you and our planet.

We use timber more efficiently
and with less impact on the
environment than a
traditional timber floor.

Origins Collection

The Origins collection of flooring encompasses the natural beauty of the raw oak with only minimal treatments for those looking for more traditional looks.

With a wide array of colours from bleached blonde through to nut brown, these floors make every room warm and inviting

Herringbone Collection

Heritage Collection

Evocative of 18th Century French oak floors found in European Chateaux, Castles and Stately Homes, our Heritage Collection is designed to bring the elegance of a bygone time to your space.

Details in texture are handcrafted by artisans skilled in replicating the characteristics of reclaimed floors. With open, raised knots, cupped or distressed edges and well-worn, uneven surfaces plus a wide range of colours and plank widths, no detail is overlooked.

Our planks are aged using a natural oxidation process that works in unison with the oak's natural tannins to produce a floor that is one of a kind.

Profile: T&G Micro bevel:4 sides

A photograph of a wooden floor in a classical building interior. The floor is made of wide, light-colored wooden planks with a natural grain and some dark spots. In the background, there is a stone wall with a decorative railing featuring lion-like finials. The lighting is warm and directional, coming from the right, creating soft shadows and highlighting the textures of the wood and stone.

Underlay

Natural Rubber Underlay for floating all of our 1 strip engineered wood flooring.

3mm acoustic

Silver Rubber Underlay

1.22m Width x 12.35m Length x 3mm Depth (15.07m² rolls)

This is our 'standard' underlay but still with an incredible acoustic performance of 24db thanks to its solid rubber construction cutting down noise levels to make any room more comfortable. The unique built in vapour barrier also ensures your floor is protected from ground moisture*.

6mm acoustic

Gold Rubber Underlay

1.22m Width x 8.2m length x 6mm depth (10m² rolls)

6mm Acoustic Gold Underlay gives you maximum sound energy absorption – with an outstanding impact and sound insulation level Of 32db. Also includes the built in vapour barrier to protect your floor from ground moisture*.

Wood Fibre Panel Underlay

Our economy underlay offers sound proofing qualities up to 19db and makes an ideal budget choice for floating floors.

Thickness : 5mm / Pack size : 10.03m²

** Subfloors should be tested and confirmed as suitably dry prior to the installation of any wood flooring. Any doubt, or for piece of mind we recommend using either a liquid Damp Proof Membrane (DPM) prior to installation regardless of floating or glueing the floor down. Bona Quantum Adhesive can act as both a DPM and an adhesive in one application.*

Bona Products

We stock a wide range of Bona ancillary products to complement our wide range of hardwood flooring. From adhesives to cleaning products, we can offer it all. Please refer to our website, or call for further details.

The vast majority of our wood flooring has undergone some degree of hand finishing ensuring a consistent high quality and performance wood floor. This hand finishing gives each of our floors a 'bespoke' feel and will be unique in terms of grain and colour.

Surface Coating / Sealer

All of our oak floors are treated with the specifically designed Extreme Matt Oil or Bona Natural Sealer. Both the Extreme Matt Oil and Bona Natural Sealer, as long as the floor is kept clean during installation and undergoes regular basic domestic cleaning, will require no further applications throughout the floor's life.

Why is your floor cleaner the best choice for maintaining my wood flooring?

Oaksmith Flooring are official stockists of Bona Wood Care products, adhesives and tools. Bona Oak floor cleaner is said to be meticulously crafted to preserve the natural beauty of Oak wood, effectively removing dirt and maintaining a polished finish. Its specially formulated solution ensures gentle yet powerful cleaning, leaving your Oak floors looking pristine without compromising their integrity. We trust Bona wooden floor cleaner for a reliable and effective solution to keep your Oak wood flooring in impeccable condition.
